P Lohithaksha

Data Scientist | +917207809767 | Gmail | LinkedIn | GitHub | Medium | Portfolio

Summary

Data Scientist with 2+ years of experience specializing in machine learning, statistical modeling, and financial analytics. Experienced in building predictive models for time-series forecasting and fraud detection using Python and SQL. Strong focus on feature engineering, model evaluation, and delivering business impact through data-driven insights.

Professional Experience

Data Scientist Feb 2024 – March 2026

Raymond James *Florida, USA*

- Designed and deployed financial time-series forecasting models using ARIMA, GARCH, and Exponential Smoothing, improving portfolio return predictions by 18%.
- Developed fraud detection models on imbalanced datasets using Logistic Regression, Random Forest, and XGBoost, reducing false positives by 15%.
- Built feature engineering pipelines and evaluated model performance using ROC-AUC, Precision-Recall curves, and cross-validation techniques to improve model robustness.
- Contributed to machine learning model deployment and monitoring workflows, ensuring stable performance and detecting model drift across financial datasets.
- Applied anomaly detection techniques to identify unusual financial transaction patterns and enhance fraud detection capabilities.

Data Analyst Intern Aug 2021 – Dec 2021

Unical Systems *Hyderabad, IN*

- Partnered with business teams to define key performance indicators (KPIs) and deliver actionable insights that improved marketing decision-making.
- Performed data cleaning, transformation, and analysis on structured and unstructured datasets using SQL and Python.
- Designed and maintained interactive Tableau dashboards for executive reporting and customer behavior analysis.
- Optimized SQL Server databases and developed efficient queries to support analytics and reporting requirements.
- Applied Natural Language Processing (NLP) techniques, including tokenization, stop-word removal, and lemmatization, to analyze customer feedback and reviews.

Education

Lamar University Beaumont, TX

Master of Science in Computer Science *Aug. 2022 - Dec 2023*

Technical Skills

- **Programming Languages**: Python, SQL, PySpark, Java
- **Databases**: Hive, Impala, Sqoop, Spark SQL, MySQL, Oracle, Azure Data Lake Gen2
- **Machine Learning & Analytics**: Regression, Classification, Logistic Regression, Random Forest, XGBoost, K-Means, DBSCAN, Time Series Forecasting (ARIMA, GARCH), Scikit-learn, Pandas, NumPy, NLP
- **Visualization**: Tableau, Power BI, Matplotlib, Seaborn, Plotly
- **Cloud & Deployment**: Azure Cloud, AWS Cloud, Azure DevOps, GitHub, Anaconda Enterprise
- **Methodologies & Tools**: Agile, Scrum, Waterfall, JIRA, Azure DevOps Boards
- **Statistics**: Hypothesis Testing, A/B Testing, ROC-AUC

Certifications

- Postgraduate Program in Data Science and Analytics with GenAI
- AWS AI Practitioner
- AWS Cloud Practitioner
- KPMG Data Science Pro-Degree
- Microsoft Database Fundamentals
